## NANO

Our home charging stations are very maintenance and trouble free and now quite affordable with the NANO. You can quickly connect your EV as you would on any public charging station, making charging an easy step in everyday life and making the pleasure of owning an EV even better. Special feature of NANO is also dynamic power control, so you can charge without worrying that main fuse will blow because of your electric car. Single phase up to 7 kW.

## STANDARD

Bigger brother of the Nano is convenient charging option for customers that have electric vehicle that can charge 3 phase. Dynamic power control, kWh counter and timer are also available, so you can charge without worrying that main fuse will blow because of your electric car. Three phase up to 22 kW.

## DUO

DUO is the smallest charging station that offers 2x22 kW power in a minimalistic robust enclosure. It is perfect for homes with two electric cars or companies with fleets of electric cars. Power sharing function between the two electric vehicles is also available, front plate could be customized with company logo.
